

LOW CARBON VEHICLE

special edition

Low Carbon Vehicle Special Edition 2017 Yearbook

Double Page Editorial Entry - Booking Details

The next issue of energy engineering's Low Carbon Vehicle Special Edition, published in January, will feature the 2017 Yearbook.

Each entry will consist of a double page editorial spread and will offer a great platform to feature your company's technology, products or expertise. Your entry could be a company profile, a case study of a recent project or a comment piece.

The double page entry rate is just £695 (our journalists are available to assist with preparing your entry if required).

This includes not only appearance in the print Yearbook which will also be distributed at key events in 2017 in addition to our regular circulation, but also in the digital edition, which will be hosted on the

energy engineering website throughout 2017, perfect for social media tie-ins etc.

We will also provide pdfs of the double page spread for your own marketing use.

To secure your place in the Low Carbon Vehicle Special Edition 2017 Yearbook please complete the form below and we will get back with deadlines, what we need etc.
